

Pain Free and Back to What Matters

"I was recently diagnosed with spinal stenosis and suffering terribly. Both of my hands and all fingers were numb and getting progressively worse. My lower extremities were seriously affected and it was difficult to walk or even tie shoe laces. I was recommended to see Dr. Zachariah George at NSPC and I did.

Over the course of about two weeks post surgery I started gaining most of the feeling back in my hands. Today I can say my lower extremities are close to being back to total functionality. I cannot thank Dr. George, and his entire team enough.

Prior to the surgery I often wondered what if? What if this condition stayed with me for the rest of my life? Dr. George provided me with the confidence and then the treatment I needed to get me back to normal, in a short period of time."
