

Experts in Minimally Invasive Brain and Spine Surgery

NSPC Brain & Spine Surgery provides state-of-the-art treatment of brain and spine disorders. Founded in Freeport, NY, in 1958, NSPC Brain & Spine Surgery (NSPC) is one of the largest, private neurosurgical groups in the U.S. Our experienced neurosurgeons are experts in “Bloodless” spine and brain surgery, including endoscopic spine surgery, radiosurgery, endovascular brain surgery, and other minimally invasive techniques. These advanced procedures are used to treat herniated disc, brain tumors, brain aneurysms, trigeminal neuralgia, and other complex adult spine, brain, and neurovascular conditions.

Five reasons to request a consultation with us today:

- New patient appointments in less than 48 hours.
- Only our experienced neurosurgeons will perform your surgery.
- First practice on Long Island to adopt routine collaborative care for complex spinal surgeries.
- Minimal office appointment wait times.
- Independent, private practice.

NSPC’s Care Centers

Spine Center
